

Software Tools Developer - (Manufacturing)

January 17

Our Business

geo's software technologies range from ultra-low power IoT to big data cloud services. We are a small and agile development team and our engineers work on a wide range of projects, typically following a product from early concept to production either as an individual or as part of a scrum team.

We are growing our technical team to support the expansion of our business and product portfolio and have a number of new roles focused on developing innovative consumer devices and cloud services.

Working at geo combines the engineering opportunities of a start-up with the stability of growing revenue from high volume production. It's a great place to work, to grow your career and to develop products shipping into millions of people's homes.

You will have proven experience of delivering software based products and be able to demonstrate technical expertise in one or more areas. You'll be enthusiastic about developing breadth as well depth in your career and not be afraid to work across boundaries and disciplines. Our philosophy is to hire great engineers and to give them work they love, we don't have a 'box' to fill with specific skills and seniority.

Responsibilities:

- Write / evolve the production tools against the requirements of the business according to the roadmap
- Keep the production servers running to support manufacturing, including maintaining the databases and related processes
- End-to-end provision of the “connected systems” on to the various cloud/production databases (evolving the tools to make this easier)
- Monitoring the health of the system, and providing metrics as needed
- Interfaces into Engineering, Production, Customer Support, Commercial & IT.

What you need for this position:

- 3/5 years of tools development experience
- Experience with C#, Java and SQL is essential
- Windows experience and experience of / or a desire to learn Linux
- A basic understanding of Cryptography
- Any other web technologies useful
- The successful applicant should be good at documentation
- Ability to remain calm under pressure and take a methodical and structured approach to all tasks, in particular when following ‘software / release test process’
- Strong interpersonal skills, and able to develop relationships at different levels

Who are geo?

Based in Cambridge (UK) geo specialise in the design, manufacture and support of energy management display and information systems for domestic markets across Europe and Australasia. geo is one of the leading home energy management system companies in the world having sold well over 2,000,000 systems. With major contracts to supply the UK smart metering programme, multiple connected home contracts and a growing distribution channel the company is looking forward to a period of substantial growth.

Applications:

To apply for this position please email your CV and Cover Letter outlining why you are interested and what you can bring to this role together with your salary expectations and availability to our Recruitment Manager, Kelly Haston to kelly.haston@geotogether.com

Recruitment Agencies:

We prefer to hire people directly, but we do have a preferred suppliers list (PSL) and preferential rates in place for when we need some help. In that instance our Recruitment Manager - Kelly Haston - will be in touch. Please respect that we do not accept unsolicited calls, CVs or applications from recruiters or agencies not already on our PSL. Please note that any submission of unsolicited CVs and applications in advance of an agreement between geo and the recruiter does not create any implied obligation on the part of geo.
