

Minim+ energy monitor

Simple, affordable, effective

Overview

The Minim+ electricity monitor uses a simple and intuitive monitor to help people engage with their energy habits.

Using intelligent graphics - like a speedometer to show current energy use and a budget bar to help keep track of costs - the Minim+ gives energy control back to homeowners.

Key features

- Uses **geo's** 868 MHz Legato* protocol for greater range and reliability
- Razor sharp, high contrast, colour, backlit LCD display
- Shows real-time electricity usage and historic consumption
- Indication of performance against a user-configurable budget
- Current tariff indicator
- Supplied with one sensor: CT clip, LED sensor or P1 cable
- Supports up to three separate tariffs (single daily periods) with optional standing daily charge
- Ambient temperature
- Backlight control (always on or timed)
- Transmitter battery status and signal strength indicators

Technical details

Dimensions: 83 x 82 x 33 mm
Data storage: 5 months
Power supply: 230 Vac, 50 Hz
Consumption: < 0.6 W
Radio: 868 MHz Legato* (24 mW)
Display: 4 colour PMVA backlit
Contents: Minim+
Power supply (UK or EU)
Transmitter + 3 x AA batteries
CT clip / LED sensor / P1 cable
